

A tummy tuck involves having surgery under general anaesthetic and normally takes 3.5 - 4.5 hours. The Dr does skin removal, muscle repair, and liposuction of the stomach area only, so should you require other areas of liposuction this is at an extra fee.

The cost of our package for this procedure is €3400 which includes airport transfers, cost of pre-op tests, the op itself, surgical

corset, 2-3 nights in the hospital, and the stay in the hotel for you and your partner.

You would need to be in Turkey for a minimum of 1 week.

Another type of Tummy Tuck is called a fleur de lis. A fleur de lis abdominoplasty is an operation designed to rejuvenate the abdominal area and removes excess fat and skin.

This operation is often performed for patients who have a lot of skin/fat excess in the upper abdomen and the flanks and can also be used where patients already have midline abdominal scars to help rejuvenate.

The cost of a fleur de Lis tummy tuck with 180-degree liposuction is €3990.

The cost of a fleur de Lis tummy tuck with 360-degree liposuction is €4600.

Drain removal normally varies (depending on how much fluid is collected in the drains) between 2/3 days.

Pain relief is given at maximum level during your hospital stay and you are given a prescription to take to your hotel/home which includes Antibiotics, pain relief blood thinner and tummy protector, you need to allow around £50 for this.

The Getslim team are with you whilst you are in hospital but you should have someone with you at the hotel as you may struggle on your own.

Full recovery time is approx. 6 weeks so no lifting heavy objects etc. The first week you need to walk slightly bent over which is vital otherwise you can open internal stitches, you will need to sleep in a V-shape for 2 weeks.

Prior to booking your flights, the Dr requires photos to ensure you are a suitable candidate for a tummy tuck and if you are then the Dr can advise which surgery is appropriate for you.

We look forward to hearing from you.

Kind Regards
